Scrap Dragon®

The smart way to buy scrap

FORGET ABOUT WIMPY WIRELESS

PDA's are too tiny. Tablet PC's are too fragile. Our Toughbook wireless monitor is rugged, reliable and user friendly. It has a waterproof touch screen that works with all of Scrap Dragon's touch enabled applications. Use it anywhere in your yard or warehouse, up to 300' from an access point.

CONSIDER THE POSSIBILITIES

What can you do with it? You could have a greeter in the yard starting a ticket before the customer pulls onto the scale. Your inspectors could enter deductions in the yard. Your warehousemen can weigh material while driving a forklift. Consider the possibilities.

TECHNOLOGY MEANS POWER

First we eliminated the keyboard & mouse, now we've freed you from the rest of the computer. With Transact Payment Systems, you get more Purchasing Power because we take the latest available technology and make it easy to use.

Here are a few POWERFUL things that you can do with Scrap Dragon and our companion products, JPEGer and Switchware.

- ◆ Buy scrap using just one finger and our Touch screen application.
- ◆ Pay customers safely using an ATM machine
- ◆ Identify customers using a bar coded identity card or key chain.
- ◆ Identify customers using vehicle license plate recognition.
- ◆ Add new customers using the mag stripe on their drivers license.
- ◆ Automatically take a picture of every step of the purchase (Gross, Tare, Payment).
- ◆ Finish every purchase before the customer leaves the scale.
- ◆ Automatically capture weights from your electronic scale indicator.
- ◆ Keep an image of the customer's driver's license on file & display it at the scale when buying scrap.
- ◆ Pop up a customer specific price list when buying scrap.
- ◆ Print bar code labels for your inventory then just scan as loaded for shipment.
